

PLANTMASTER - WEAVEMASTER

The truth about wireless monitoring systems

"They are not reliable!"

"They are not secure!"

"They only work for a small number of machines!"

"They disturb other wireless networks!"

These are only a few statements one can hear in the market. And they are probably based on real experiences with Wi-Fi based systems. But since BMSvision started the introduction of its wireless technology in 2003, more than 100 Bluetooth based systems covering the connection of over 6000 machines have been deployed successfully.

It was Valeo (Laval, France) who was the first to go with a wireless PLANTMASTER system at the end of 2003. By then, 18 months of profound research and development of our engineering team had gone by. Bertrand Bidan, project leader at Valeo still remembers how BMSvision persuaded him to go wireless:

"It was a deal we couldn't refuse. If the PLANTMASTER Bluetooth solution would appear to be not working sufficiently, BMSvision would put a cabled system in place free of charge. But it worked from the first day and we didn't regret our decision, especially when 2 months later all our injection machines changed places!"

The choice to go with Bluetooth instead of Wi-Fi was not easy but has proven to be the right one. Today, BMSvision offers its wireless solution as a standard concept for its monitoring systems PLANTMASTER for the plastics and pharmaceutical industry and WEAVEMASTER for the textile industry.

About BMSvision

BMSvision, established in 2007 as a carve-out from the Barco group, is a leading supplier of Manufacturing Execution Systems (MES) for discrete manufacturing, with focus on the textiles, plastics and pharmaceutical industry.

Under the brand name BarcoVision and with over 30 years of experience as a former division of the Barco group, BMSvision offers a wide range of systems aimed at productivity, quality improvement and energy management.

BMSvision is present at key locations around the world, either with own branch offices or through a world wide network of agents and service centers.
